

Bush Holder

From Engineering Dictionary

Related Keyword: [bush](#), [holder](#)

English: Bush Holder

Bush for the inclination slide is buried, and parts used to guide the slide rod are said. The passing hole of the slide rod is made in the type and because it is difficult to make accuracy good, bush holder is made with other parts. It becomes easy to make the type by making it to other parts, and the type can be assembled early. The center of the rod hole of the inclination slide (part where the slide rod is installed) and the center of the bush hole of bush holder are matched, and bush holder is installed on the position in which the slide rod smoothly does the slide.
