

Runner Lock Pins

From Engineering Dictionary

Related Keyword: [runner](#), [lock](#), [pin](#)

English: Runner Lock Pins

The under cut the pin ahead and the molded article and the runner are separated, the sprue is pulled out from sprue bush afterwards, and the runner is taken out. The under cut of up-to-date shape of the pin is not able not to be able not only to separate the runner from the molded article when it is too weak but also to take it out also by the runner. The material of the pin uses hardness in the SKS system before and behind HRC50.
